FEATURES
The Skid Steer Pallet Forks are 48" long, Class II are 1 1/2 inches thick, 4 inches wide and completely heat treated. Our forks are completely adjustable and come with side steps to make it easy for you to climb in and out of your machine. The frame is constructed of 3" channel and 2" x 3" angle which is 3/8" thick. The forks are rated at 4000 lbs. These forks are designed for smaller loaders that don't need the extra capacity of our normal skid steer loaders. These forks permit the operator to hydraulically adjust the width of the tines infinitely variably without leaving the operator's cab.
